

Cuddle pouch Instructions

Materials needed:

- 3 cm thick batting / wadding
- Cotton fabric
- Fleece fabric

IMPORTANT: All fabrics must be washable at at least 60°C! Do not use detergent, as bats can react negatively to detergent residues.

Step 1.

For a finished pouch measuring 20 × 20 cm, cut the following pieces:

- Wadding strip: 10 × 40 cm
- Cotton fabric: 21 × 41 cm (plus seam allowance)
- Fleece: 20 × 40 cm (plus seam allowance)

The cotton fabric is cut slightly larger because it will form the outside of the pouch. If necessary, finish the edges of the cotton fabric to prevent fraying.

Step 2.

Place the fleece and cotton fabric right sides together (the fleece print should be face down and the soft, fluffy side of the fleece face up), and center them on the batting strip. Secure them with pins and sew all three layers together using a straight stitch.

When unfolded, it should look like this.

Step 3.

Fold in half, right sides together, and pin, leaving an opening for turning the pouch right side out (marked with stars). Sew all the way around, leaving only the marked opening unstitched.

Step 4.

Turn the pouch right side out. Pin the turning opening closed. Fold the finished edge of the opening inward by lifting the snuggle pouch up. Then sew along the entire edge where the opening is located using a straight stitch.

Step 5.

Tuck the fleece fabric inside the bat-print fabric so that it forms a snuggle pouch.

Step 6.

Trim all loose threads so that no bat claws can get caught!

... and you're done! :)
