Bat House Instructions
It's really easy!

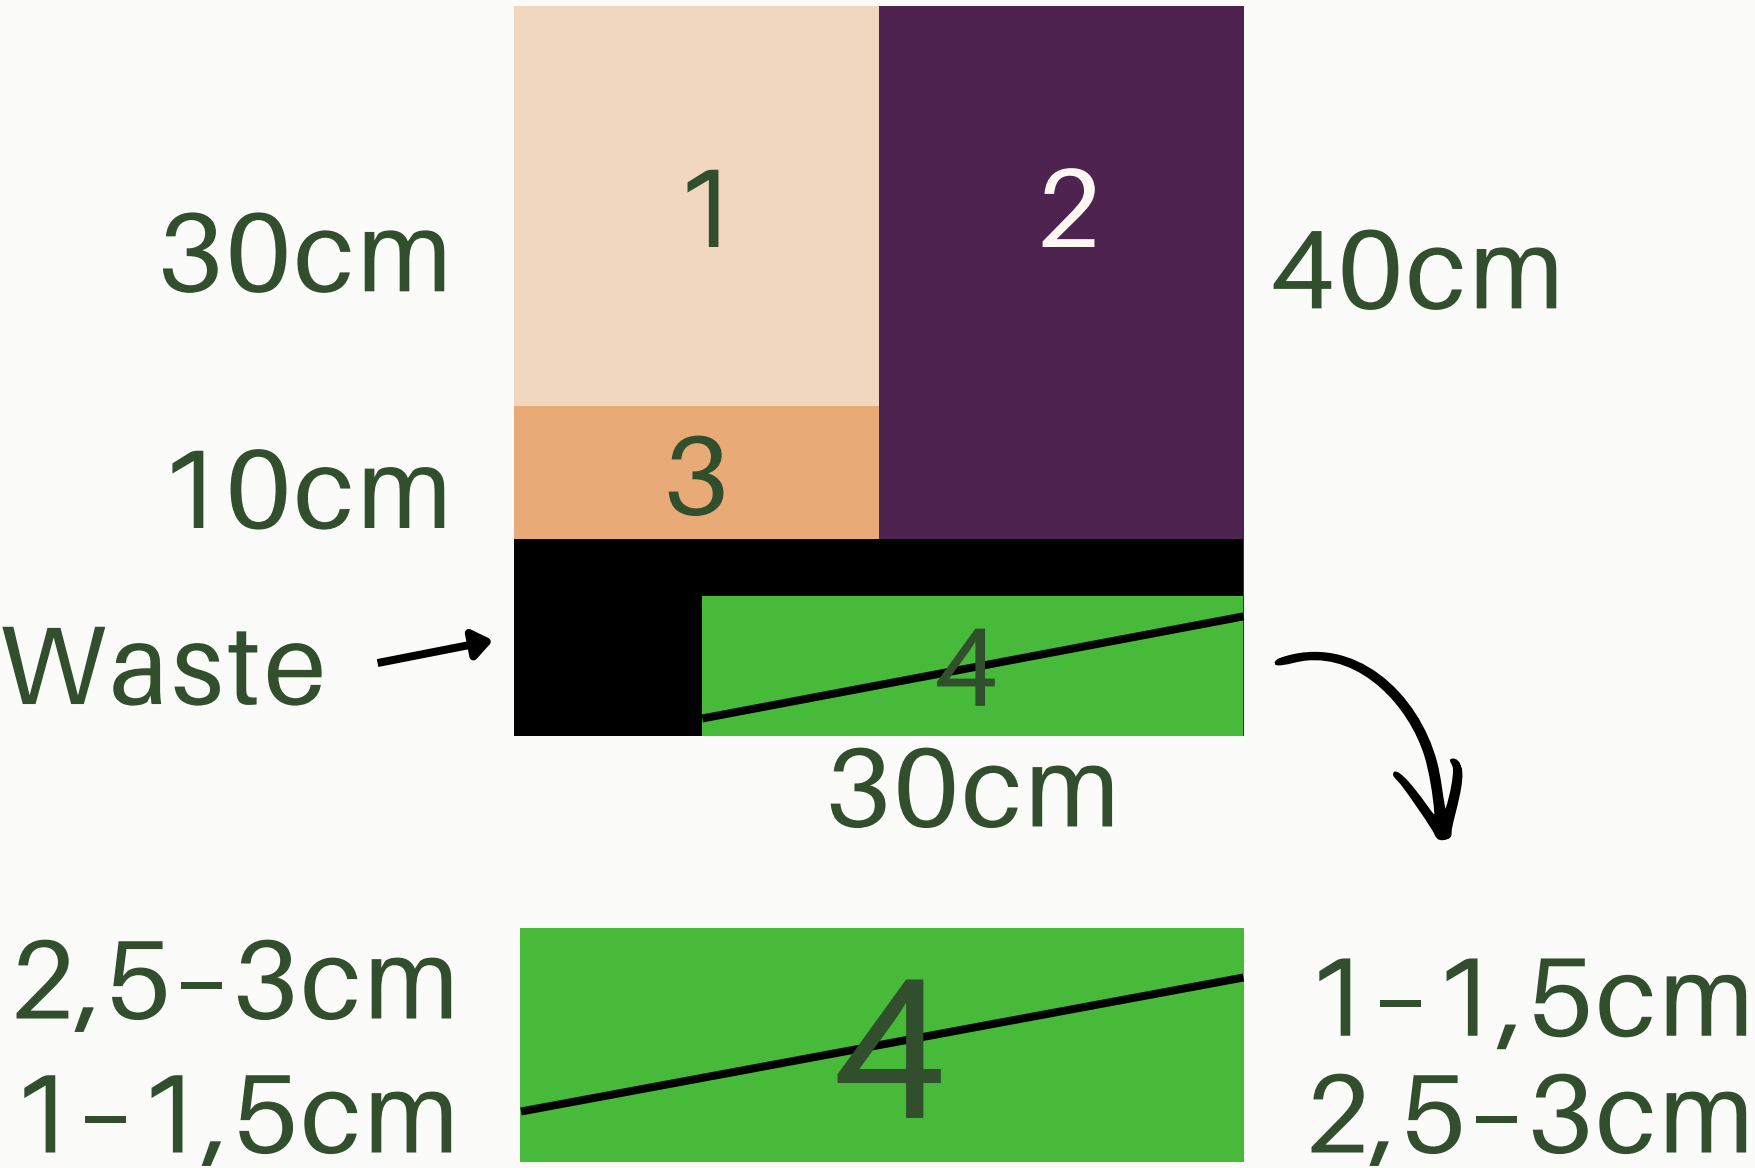

@FLEDERMAUS_STATION_OESTERREICH

Oesterreich

50cm x 50cm x 2,5cm

25cm 25cm

1

2

1 Transfer the measurements onto the board and cut out the pieces.

3

4

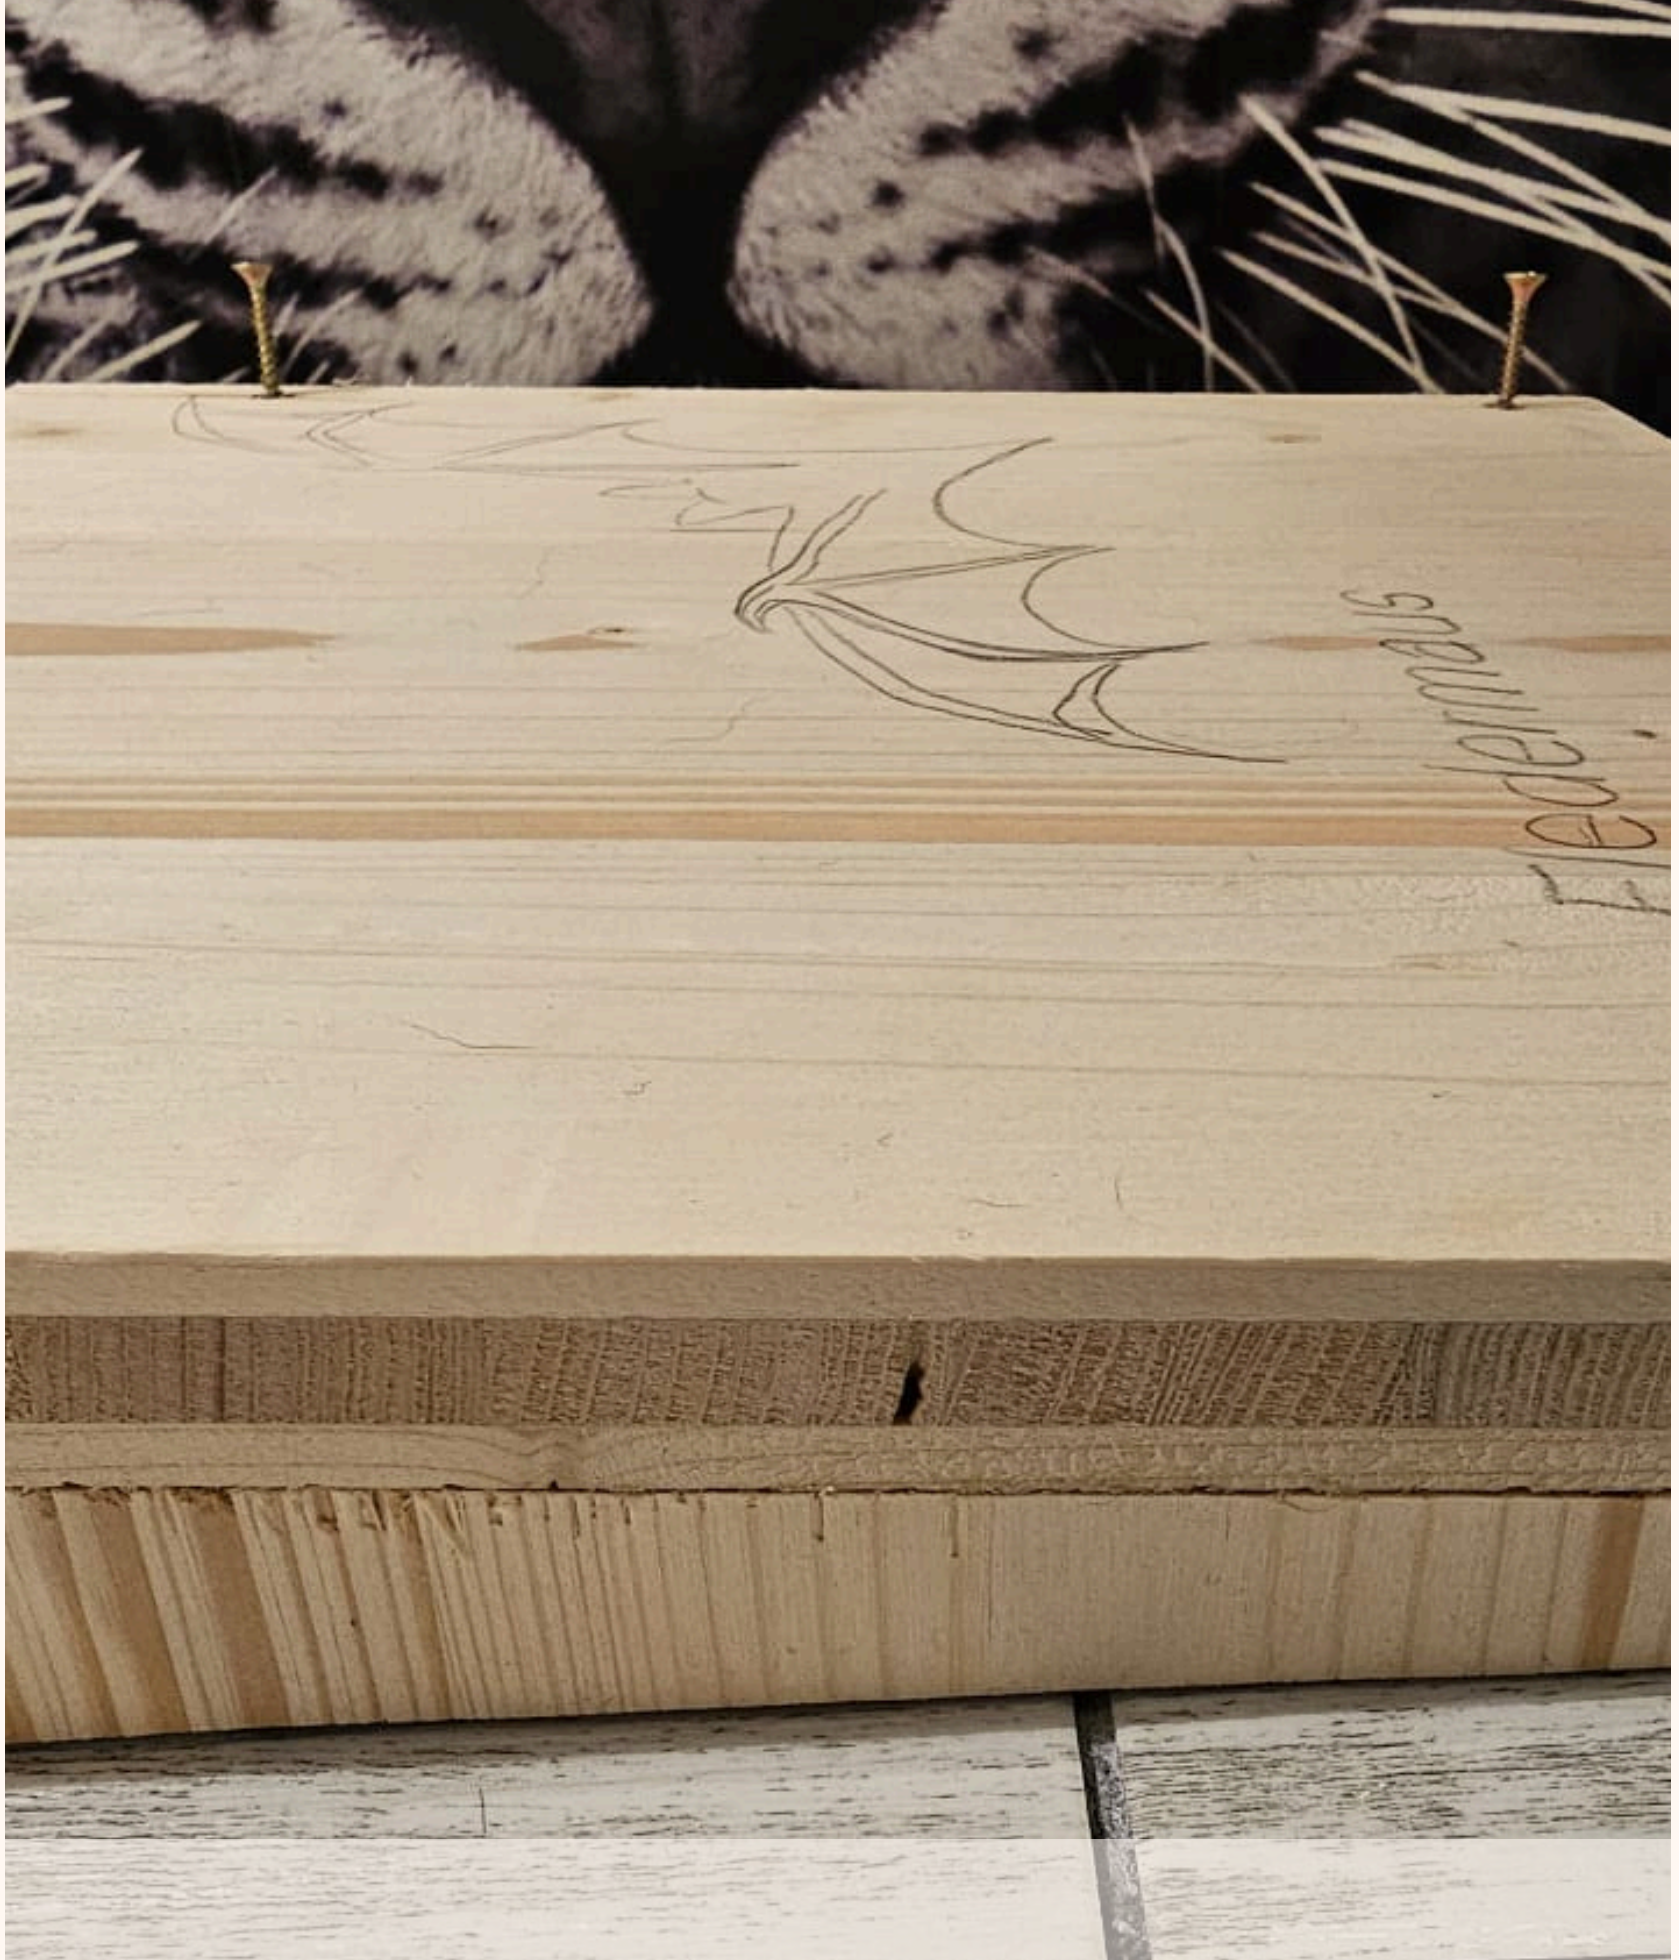

2 Roughen up panels 1+2 if the wood is too smooth, otherwise the bats won't be able to grip properly 😬

3 Place the top panel (1) & wedges (4) flush together & screw them in place.
! The narrow side **MUST** face upwards.

TIP: Pre-drill holes to prevent the wedges from splitting.

4 Screw the base panel (3) onto the top panel (1) + wedges (4).

5 Screw cover panel (3) onto the box.

 **TIP:** Cut the top of the bat house at a slight angle so rainwater can run off.

6

To increase durability, the outside of the box should be coated with non-toxic paint

Done!

@FLEDERMAUS_STATION_OESTERREICH

WHY NOT...

have one coffee less during the week and
donate to save our bats instead!
